**Medical Physics / Biophysics / Imaging:**

**Postdoctoral (+) position on hyperpolarized Xenon and flow MRI with a view**

We are looking for a motivated and talented individual to work on an exciting project regarding hyperpolarized xenon and 4D flow MRI. The project is part of the newly funded collaborative research center BULK REACTION and is located in Kiel, Germany (ocean side). The position is embedded in the molecular imaging north competence center (MOIN CC) with great colleagues and access to state of the art equipment incl. 1.5T, 3T, 7T MRIs and 400 MHz NMR, parahydrogen hyperpolarization and DNP. The position is funded to 100 % and we support you in developing your scientific carrier in many ways.

If you are interested, please get in touch via [mail@moincc.de](mailto:mail@moincc.de). Many thanks!
